

Round table discussion:

" Challenges and Opportunities in PROTAC vs Small Molecules Development"

Panelist:

Dr Danette Daniels (Promega, United States)

Danette received her B.A. from Columbia University, Ph.D. in Biophysics from Yale University, and completed a postdoctoral fellowship at Stanford University School of Medicine studying the biophysical and biochemical mechanisms of the Wnt signaling pathway. She has been at Promega Corporation for 15 years and is currently an R&D Group Leader of Functional Proteomics. She leads a team developing technologies and performing research to understand dynamic intracellular interactions within the focus areas of epigenetics, targeted protein degradation, and drug discovery.
